

# ADEC SOLUTIONS UK

**Checking Billing for 150m+ parcel transactions per annum since 2011**

**An S&P500 Logistics Company**

[adec-solutions.co.uk](http://adec-solutions.co.uk)

## THE CLIENT

S&P500 Company providing logistics services worldwide known for its timely and safe delivery.

## THE CHALLENGE

Logistics companies necessarily focus on speed of delivery, but the client wanted to ensure accurate billing without any detriment to timeliness metrics.

## THE SOLUTION

An intensive inspection process that uses a blend of technology and labour has been improved through close collaboration with the customer. The entire inspection process covers operations at key points of the logistics chain; through this, corrective measures have been implemented. Amongst which, a high volume of billings-to-date after reviewing billions of parcels per annum had been noted.

We played a key role in assuring our client that they bill their customers accurately, by integrating our operations with our client to produce consistent results.

With the efficient use of data visualisation and data encoding, our dedicated resources and technology vastly improved accuracy and efficiency. Our solutions reduced error rates, streamlined turnaround times, and even helped anticipate volumes that could impact the whole operation.
